9. ☐ Other _____.

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: The section 22 of cross pole 2 has not been indicated by a reference sign. Moreover, there should be a line of separation between sections 21 and 22 of cross pole 2, shown in figures 1-3,10 and 11. As currently shown, the cross pole 2 appears as an integral member, which would be unable to fold.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the claims are allowable over the prior art of record because the prior art fails to show or suggest, either singly or in combination thereof, a folding table/chair combination as set forth, including a table top having a top surface and a bottom surface extending between a seat end and a second end, the table top being divided into a first planar

portion and a second planar portion, the table top configured to be selectively foldable, wherein the first planar portion and the second planar portion have a storage area formed in the bottom surface thereto. A table top supporting assembly comprises a first cross bar having a first end and a second end, the first end being connected to the first planar portion and the second end being connected to the second planar portion, wherein the first cross bar has a pivot connection disposed along the length thereof for allowing the first cross bar to fold. The supporting assembly also comprises a first leg member having a first end and a second end, the first end being connected to the first cross bar, and a second leg member having a first end and a second end, the first end being connected to the first cross bar.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
